

# VPC Tanks

## Septic Tank Additional Information

### Certifications and Warranty

- VPC septic tanks are IAPMO certified, meaning they are rigorously tested to meet top industry standards.
- VPC provides a 3-year manufacturer warranty covering workmanship defects (labor and removal not included).
- Warranty status can be verified using the tank serial number.
- All tanks are made in the USA from UV-stabilized, BPA-free HDPE.

### Products & Purchasing

- Available sizes: 500, 750, 1000, 1250, and 1500 gallon in single and double compartment styles.
- 1000 and 1500 gallon tanks are IAPMO certified.
- Sold through The Home Depot and plumbing wholesalers (not direct-to-consumer).
- Tanks ship on forklift-ready pallets for safe delivery.

### Installation & Use

- Burial depth: 6" minimum / 30" maximum.
- Use manhole risers to bring access to grade.
- Tanks are underground use only and must be vented through the building DWV system.
- Local code approval is required before purchase.
- Septic tanks cannot be used above ground, as holding tanks, or for water storage.

### Maintenance & Safety

- Pump every 3-5 years depending on usage.
- Tanks must be refilled immediately after pumping.
- Plastic tanks can last 30+ years when properly installed and maintained.
- Never enter a septic tank - toxic gases can be fatal
- Do not drive or build over a septic tank or drainfield.
- Buoyancy controls may be required in high water table areas.
