RE: Valencia Pipe Company (VPC) Tank Approvals

Dear Mr. Butler:

The *Technical Standards for Subsurface Sewage Disposal Systems* (Technical Standards) stipulates that this Department shall approve non-concrete septic tanks. This Department has reviewed the technical documentation and specifications submitted for the four (4) polyethylene tanks noted below. The information submitted documents that the tanks meet the requirements in the Technical Standards for non-concrete tanks. Therefore, this Department hereby APPROVES the tanks below to be used as septic tanks only.

Manufacturer	Model #	Size	Compartments	Color
VPC	87-41718	1000 gallons	1	yellow
VPC	87-41720	1000 gallons	2	yellow
VPC	87-41758	1500 gallons	1	yellow
VPC	87-41760	1500 gallons	2	yellow

The Technical Standards stipulates that non-concrete septic tanks must be installed in strict adherence with the manufacturer's installation instructions, and that proper bedding, backfill and compaction must be confirmed with each tank installation. All non-concrete tanks distributed in CT must include installation instructions, and each approved tank manufacturer is responsible for ensuring that this Department is provided with up-to-date installation instructions, tank specifications, and supporting documentation. Any product modifications require prior approval from this Department.

A copy of this letter will be provided to local health departments in CT, the Code Advisory Committee, and shall be posted on our program's website and may be reproduced as a means of
